

Reflective Tape - Chapter 8

High Visibility Reflective Tape engineered to improve the day and nighttime visibility of emergency response, utility, and construction fleets. Highly reflective vehicle markings can improve detection and recognition, giving drivers more time to react safely and avoid a collision. Collision avoidance may help fleet managers contain costs through lower repair, maintenance, and insurance fees. It offers durable, vibrant daytime colours. At night, its bold, high-quality microprismatic retroreflective elements efficiently return light at a wide range of angles. The single layer construction simplifies application, and eliminates the requirement for edge sealing.

Sizes & Colours Offered

- White / Blue / Red / Green
- Fluorescent: Yellow (Lime) / Orange

Applications

- Emergency Vehicle Marking

Benefits

- Fluorescent Colours : 5 Year Durability
- Standard Colours : 7 Year Durability
- Withstands Pressure Washing
- Easy to handle and apply, conforms to simple curves
- Adheres to metal, painted metal

Technical

- **Film:** Vinyl Retroreflective Film with microprisms
- **Adhesive:** Permanent pressure-sensitive adhesive
- **Thickness:** 21-26 mils (530-660 μ)
- **Min Application Temperature:** 16°C (60°F) minimum
- **Service Temperature:** -10°F to +150°F (-23°C to + 65°C)
